(54) DEVICE AND METHOD FOR CONTROLLING PRINTING AND PRINT SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To select whether or not authentication information is to be confirmed for each job by a user.

SOLUTION: When a printer driver 101c is to authenticate a user corresponding to a print job before printing, it is designated whether or not the authentication information is to be confirmed for each print job. When such a designation is performed, the printer driver 101c displays a picture for inputting the authentication information for each print job but when such a designation is not performed but the authentication information is preserved, that authentication information is used for authentication without requesting confirmation to the user.

LEGAL STATUS

[Date of request for examination]

04.12.2003

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 3984774

[Date of registration] 13.07.2007

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
